

ComancheZOOM for Thursday, February 20th

Topic: Foreflight Use & Features

Jason Staloff presents a ForeFlight intro aimed at new users, with information on updates being added for current users.

Many pilots are familiar with and use Foreflight but may not be fully aware of the many features available in the latest updates. This Zoom will give you an overview of the latest basic version and some of the new capabilities added in the higher versions. Particular attention is given to the Maps features and how to use them. His presentation ended with a general Q&A.

Tonight's Zoom is the first of three planned presentations. Still to come are:

- March 27 - details of new features since the Zoom in 2022, with Q&A.
- April 24 - more detail, with attention to features on weight and balance and glide performance.

This Zoom was not eligible for Wings credit.
