

ComancheZOOM for March 11, 2021

Topic: **Surviving a Catastrophic Engine Failure part 4: Dealing with Insurance**
with William Carpenter

This ComancheZOOM is the fourth in a series recounting Will Carpenter's experiences when dealing with a catastrophic engine failure while flying his Comanche, and his emergency landing in a Carolina bean field. In this session Will describes the decisions made in dealing with his insurance provider throughout the process.

As Will says, "This presentation is based upon my experience. If your experience differs, please put it in the chat window along with any other comments or questions. Always refer to your specific policy when making decisions about your aircraft. Every insurance company uses different procedures to process a claim."

Will has organized the presentation to address his actions, covering the following points:

- Recap of the previous presentations
- The Claim Process
 - Aircraft Totaled
 - Aircraft Not-Totaled
- Demonstrating Insurability
- What's Covered
- What's Not Covered
- Rules of Thumb
- Lessons Learned
