

ComancheZOOM for Thursday, September 19, 2024

Topic: Analysis of Survivable Accidents #2 in a ComancheZOOM series for all aircraft.
Presented by Dave Schober and Rosemarie Williams

This week's Zoom session focused on analysis of six accidents where the use of proper seat belts and shoulder harnesses could have saved lives. Learn of these events through NTSB reports and video presentations.

We also spent time discussing the pros and cons of various shoulder belt options and the methods of installation.

This Zoom presentation earned FAA WINGS credit. Attendees could register for WINGS credit through the Comanche Group website.
